

# Trade Aluminium Windows

## Fabricated by Multi Fab Limited

Our series of windows offer a range of high quality glazing solutions for general use applications to commercial use applications in side hung, top hung open out and parallel opening casements.

This versatile range of profiles can provide many solutions such as traditional casement windows inspired by the elegance and styling of timber products, or automatic parallel opening commercial windows designed to provide a balanced airflow in multi-storey commercial buildings. Many window solutions are available so please just ask!

Our profiles utilise an innovative polyamide thermal break technology that creates a barrier between the cold air outside and the warm air inside. This technology significantly reduces thermal transmittance and enhances the overall U Value of the product.

Our products are available in a choice of many systems of standard or non-standard colours, including metallic, dual colour and a unique range of textured finishes.

The series features solutions designed to meet the exacting requirements of Document L 2010.

General use applications

Commercial applications

# Trade Aluminium Doors

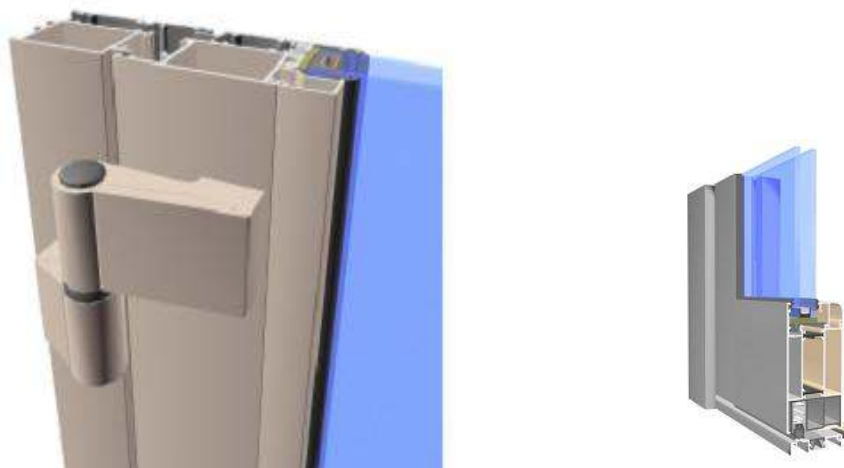

## Fabricated by Multi Fab Limited

Using various available systems Multi Fab offers a range of doors suitable for the architectural, commercial, public, new build and retail markets. The doors available are commercial hinged, swing, patio, tilt and slide, slide folding, multi-track slide and automatic.

Our doors are designed for use as open out or open in, single or double doors, internally or externally beaded with sidelight options for domestic and/or commercial applications.

Our doors are also compatible with a full range of door furniture and high security locking mechanisms. They are available in a wide range of colours and finishes that comply with all relevant British and/or European standards. Compliance with Document L for thermal transmittance applies.

Design flexibility, durability and fit for purpose are the key factors that project managers, architects and specifiers will discover when they opt for our commercial doors. Whether required for refurbishment or new build projects Multi Fab will have a solution to doors that are designed for rigorous use and heavy traffic.

Standard series profiles and heavy duty, high insulated profiles

# Trade Curtain Walling Systems

## Fabricated by Multi Fab Limited

There are curtain wall systems designed to meet the needs for a very basic low level application to towering skyscrapers. Multi Fab are able to create a dramatic but practical façade, with the option of sloped and facet-shaped glazing whilst allowing maximum light into small or large multi-storey buildings using a number of sophisticated systems. Rapid on-site installation and concealed transoms, for seamless/uninterrupted glass to glass joints, are among the many special features of our versatile systems. We can offer to fabricate systems incorporating top hung frameless vents that also accommodate windows, doors and horizontal sliders.

Various systems allow for a curtain wall designed for low to medium and high rise façades including large shop fronts and car showrooms that accommodate a wide range of window and door configurations.
