Extruder & Distributor of PVCu *Window & Door* Systems

A leading innovator of quality PVCu window and door profile systems

Selecta Systems were introduced into the UK market from Germany in 1982 and have established a standing for quality and reliability, whilst remaining independently owned by the same family who started the journey.

Selecta supply hundreds of PVCu window and door fabricators across the length and breadth of the UK, providing an array of window and door solutions for domestic and commercial properties.

Our commitment to quality and customer satisfaction is at the heart of everything we do, ensuring we meet the highest industry standards in every new build, replacement or refurbishment project.

Our **ADVANCE 70** Window & Door profile system is **extruded and stocked at our Birmingham headquarters**. Profiles are **extruded to stock and not to order**, with a minimum of 2-3 months stock available at all times, therefore **protecting customers** from any unforeseen circumstances.

Our **ADVANCE 70** Window & Door profile system is **foiled and stocked at our Birmingham headquarters**. We have a **large range of colours in stock** and available on a customer's next order, with special colours available with a fast turn-around.

Why Choose *Selecta* Systems?

Commitment to quality thus giving comfort and security for your next project

At Selecta, we work closely with our customers to provide a range of fabricator and fitter friendly window and door systems that deliver on quality, robustness and durability.

With many years of knowledge and experience, Selecta Systems are firmly established as one of the UK's leading extruders of PVCu window and door systems. As a specialist within the industry Selecta Systems peace of mind warranty is of paramount importance, with a dedicated team committed to providing only the best in terms of product and support services.

The 9 acre, state-of-the-art extrusion plant, warehouse and distribution centre based in Birmingham incorporates all the latest technology which is regularly assessed and updated according to market demands.

The purpose built extrusion plant runs continuously 24 hours a day, 7 days a week, which enables us to maintain the stock levels required to meet customer demand. We extrude the MASTERSlide Patio System, Vantage 70, EASI-FOLD Door System and our highly acclaimed ADVANCE 70 System - our 70mm sculptured, chamfered and fully integrated system. All of our window and door solutions are complemented with a range of hardware, accessories and ancillary items.

Our production methods are supported internally by extensive and thorough ongoing quality checking procedures which are further supported by external examination. A nationwide delivery service is available for all our UK customers, which boasts impressive on-time-in-full orders of 99.8%.

We also offer additional support in terms of technical and marketing expertise, which substantiates our personal commitment to customers by providing total care in terms of technical assistance and marketing services.

Premium *Quality*

We only supply premium products, ensuring the highest standards of quality, designed for durability and long-lasting performance.

Innovative & *Elegant Designs*

Our product range combines cutting-edge, contemporary designs with the timeless elegance of traditional styles, providing options that suit every property's unique aesthetic.

Extruding *Confidence*

We supply products that you can fabricate and install with complete confidence, delivering satisfaction in both the process and the final result for your clients.

Why Choose ADVANCE70 Windows & Doors?

Making homes more secure, warm and elegant

Modern ADVANCE 70 PVCu windows and doors ultimately provide you with increased thermal performance thus ensuring heat stays in the home, reducing energy costs.

Also, double or even triple glazed windows and doors have increased sound insulation along with high security locking systems and hardware.

All-in-all modern PVCu products will outperform older single and double glazed alternatives, increasing thermal efficiency throughout the home and improving security, whilst offering an aesthetically pleasing improvement to the property.

The innovative ADVANCE 70 Window and Door Profile System from Selecta Systems has been designed to blend seamlessly in to the framework of the home, combining exceptional performance with beauty and elegance.

Using the most advanced technology, products from the Selecta range of window and door solutions will provide the ultimate in terms of thermal and sound insulation, appearance, durability and security.

Enhanced Security

The ADVANCE 70 Window & Door System is PAS 24 and Secured By Design compliant to meet the latest Building Regulations.

Thermally Efficient

The ADVANCE 70 System has been specifically designed with improved weather seals and multi-chambers for thermal efficiency, capable of excellent energy ratings and U-Values.

Aesthetically Pleasing

The ADVANCE 70 Window & Door System is a complete suite of profiles designed to compliment any property, whatever the style, period or location.

ADVANCE70 PVCu Windows

Window styles to compliment the architecture of any home

The innovative ADVANCE 70 system can be incorporated into new build as well as your latest replacement or refurbishment plan, giving outstanding qualities and a superior overall finish to any project - making the property elegant, secure and improving its overall thermal performance.

The five chamber system is designed to achieve high thermal efficiency standards and U Values that already surpass current government legislative requirements and Building Regulations.

The fully integrated suite of chamfered and sculptured profiles are traditional in style and provide great strength, whilst hi-flow drainage eradicates issues that can occur due to adverse weather conditions. This superior system, as the name would suggest, meets and exceeds the highest industry standards.

PVCu Window Benefits

1. PVCu FRAME

Multi-chambered for improved thermal efficiency and performance. Our PVCu frames are also 100% lead free!

2. HIGH SECURITY

PAS 24 & Secured By Design options available. Building regulation Document Q compliant.

3. GLAZING OPTIONS

Double and triple glazing options - 24mm, 28mm and 40mm. Achieve U-values of 1.1 W/(m²K) and below.

4. RTR BAR

Use RTR (Recycled Thermal Reinforcement) Bar to increase the thermal performance of your windows.

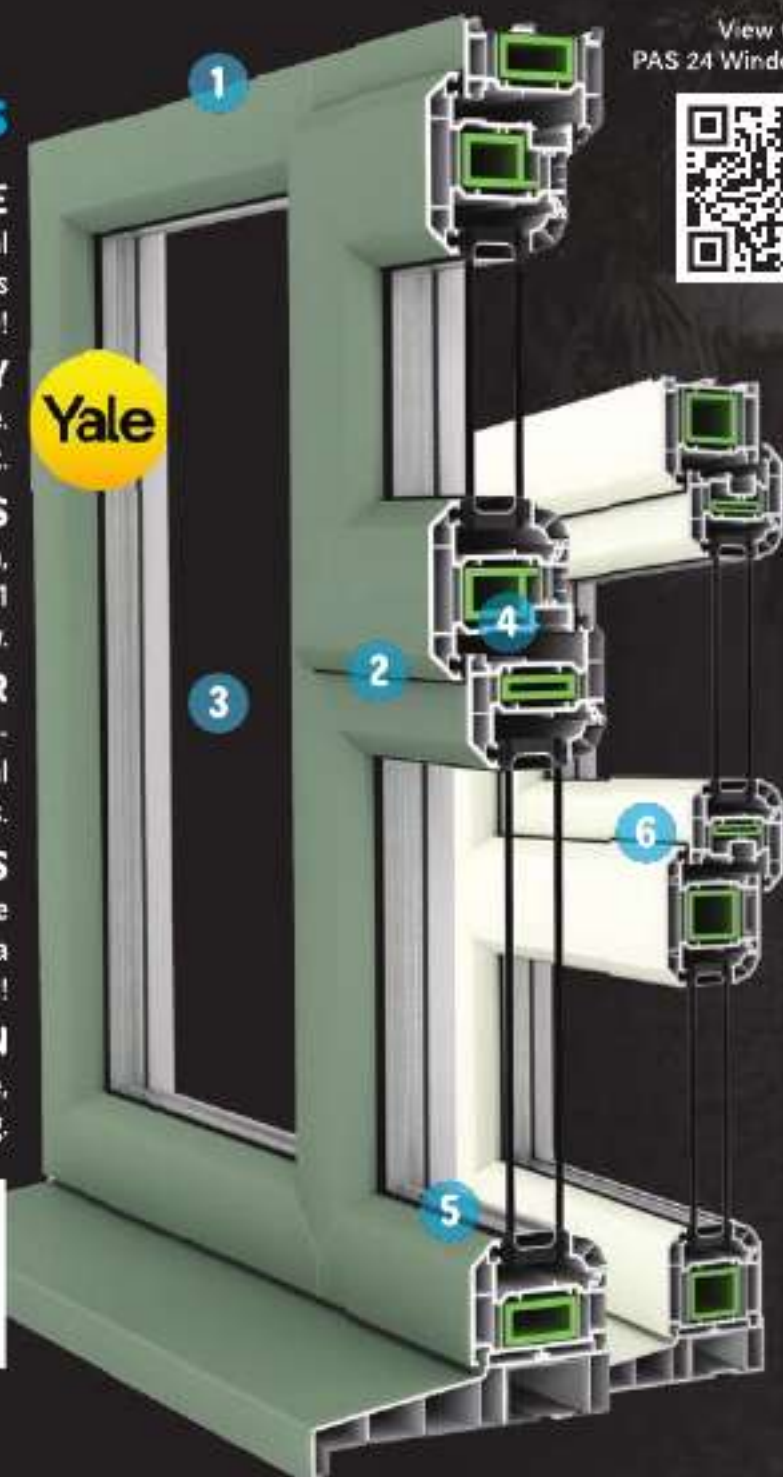

5. GASKETS & SEALS

The gaskets and weather seals are co-extruded within the frames to provide a weather tight seal - no heat loss or leaks!

6. TILT & TURN

Inward opening for effective fire escape, easy cleaning and opening.

**"The *Vergatile* PVCu
Window System"**

Casement, Bay & Bow *Windows*

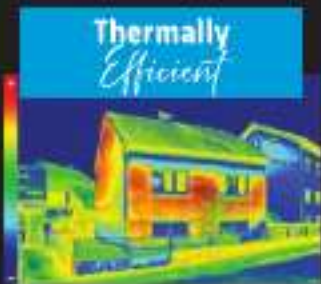

The most popular choice of window styles

ADVANCE 70 casement windows offer superb qualities that will exceed expectation in terms of performance, aesthetics and environmental issues.

Our fabricated 70mm casement windows are fully-integrated in to the ADVANCE 70 suite of profiles, with both sculptured and chamfered variations. With double and triple glazing options the 5 chambered system has been intelligently designed to meet all requirements for improved thermal efficiency.

ADVANCE 70 casement windows benefits from large reinforcement chambers, where steel sections can be inserted for additional strength and rigidity when required or increased thermal performance when combined with our RTR (Recycled Thermal Reinforcement) Bar.

Our casement windows also offer PAS 24 enhanced security options meeting the requirements of Document Q. The perfect window solution for your next new build or commercial project.

Thermally Efficient

Five chambered system for greater thermal efficiency

Enhanced Security

PAS 24, SBD and Doc Q compliant window and door profile system

Excellent Performance

Recycled Thermal Reinforcement (RTR Bar) for increased thermal performance or steel reinforcement for added structural strength

Innovative Design

A full depth central eurogroove helps to make windows and doors more secure

Pure Elegance

A sculptured design for a softer finish or a chamfered edge for a modern look

Profile Options & Technical Drawings

The 28mm double glazing and 40mm triple glazing beads are available in both chamfered and sculptured to compliment the ADVANCE 70 suite of window and door profiles.

The single lead beads with co-extruded bubble gaskets provide excellent compression and weather sealing.

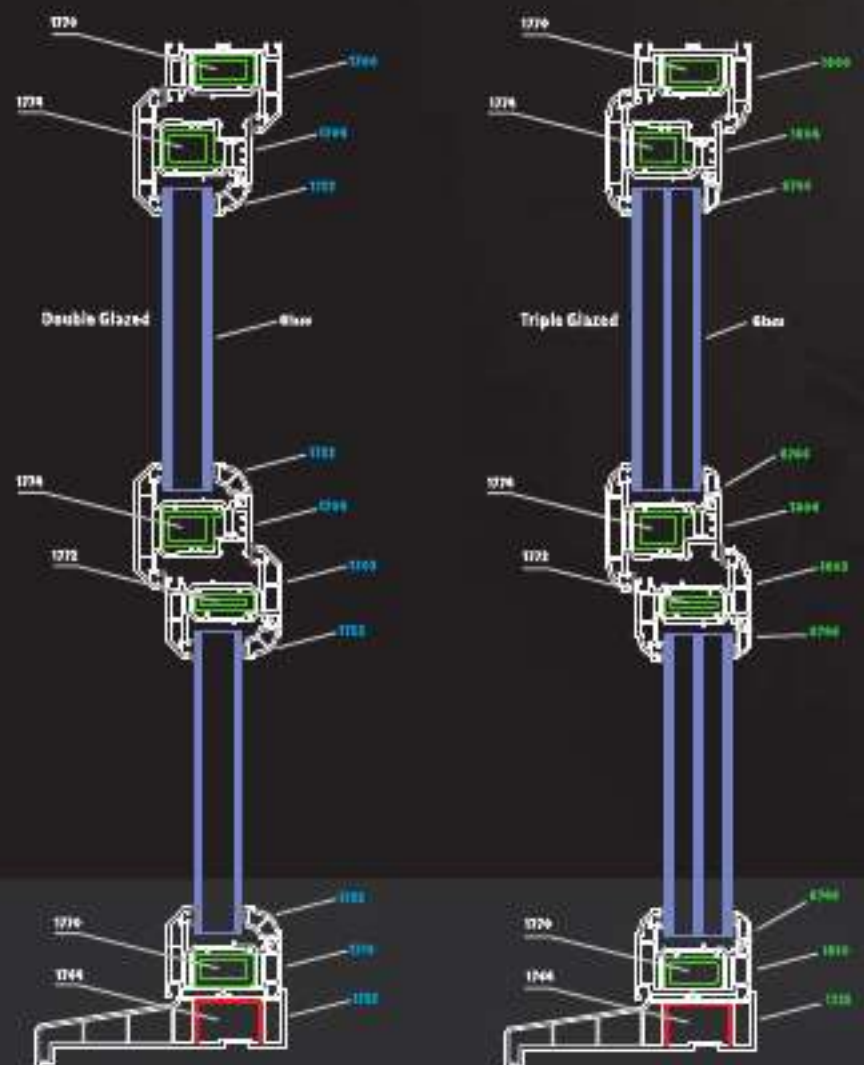

The ADVANCE 70 Window System also offers a traditional 80mm, 8 chambered frame to replicate authentic timber frames.

The traditional 80mm frame is best suited to your cottage and heritage styled properties, with the benefit of increased thermal performance, owing to its 8 chambers.

The frame has also been tested to PAS 24 compliance, therefore meeting the enhanced security requirements of Document Q.

"Excellent security and weather performance"

ADVANCE7 Tilt & Turn Windows

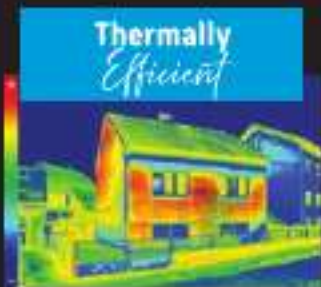

Ideal when there is restricted outward opening space

ADVANCE 70 tilt & turn windows remain a popular choice of window styles for the home, where restricted space outside makes outward opening hazardous. Tilt and turn windows are also effective for fire escape and also well designed for the maintenance and easy cleaning.

Our fabricated 70mm tilt & turn windows are fully-integrated in to the ADVANCE 70 suite of profiles, with both sculptured and chamfered variations. With double and triple glazing options the 5 chambered system has been intelligently designed to meet all requirements for improved thermal efficiency.

ADVANCE 70 tilt & turn windows benefits from large reinforcement chambers, where steel sections can be inserted for additional strength and rigidity when required or increased thermal performance when combined with our RTR (Recycled Thermal Reinforcement) Bar.

Our tilt & turn windows also offer PAS 24 enhanced security options meeting the requirements of Document Q. The perfect window solution for your next new build or commercial project.

"Secure with market leading water tightness"

ADVANCE 70 PVCu Doors

Add a grand entrance to the home

The entrance to any home serves three main purposes; to act as a welcome to the homeowner, their family and friends, to keep unwanted visitors out and to withstand the rigours of inclement weather conditions.

Whether you require an inward or outward opening PVCu door, left or right hung preference or the choice of a low threshold easy access option for wheelchairs and pushchairs, you can rest assured that our door systems will look elegant, whilst offering outstanding performance and security.

You may want to open up the living area of a property to the outside and therefore French doors, patio doors or EASi-FOLD doors would be of interest, as they can provide a wall of glass and panoramic views that are perfectly framed.

Our range of door systems, will give any property the added benefits of heat retention and reduced energy bills, whilst the weather tight seals and frames will help to keep the cold and damp on the outside. PAS 24 and Secured by Design tested door solutions provide enhanced security, thus meeting Document Q requirements.

Single Leaf Doors

French Doors

PVCu Door Benefits

1. PVCu FRAME

Multi-chambered for improved thermal efficiency and performance. Our PVCu frames are also 100% lead free!

2. HIGH SECURITY

Coloured PVCu Windows and Doors

We offer a wide range of colour options which have been put together to make the perfect colour palette for any home. There are 18 colourfoil finishes, which are available on one or both sides and therefore giving you 36 colour ways.

With modern and traditional shades complimented with authentic wood like finishes, colourfoil adds that finishing touch to any property.

"Whilst many favour the bright appearance of brilliant white window frames, the emergence of coloured and more authentically grained profiles has captured the imagination of homeowners."

Our colour collections provide you with a fantastic palette of colour options for your next project, whatever the style, period or location.

The STANDARD Collection
Consists of the most popular colour combinations.

The PREMIUM Collection
Brings together on-trend, traditional and modern colours and grained effects.

U Values & Energy Ratings

Thermally Efficient Windows and Doors

Technical Support - Energy Ratings & U Values

Our multi-chambered window and door profiles achieve Document L and Future Homes Standard U Values and Energy Ratings, without adding unwanted expense.

Reducing energy bills and making the home more thermally efficient are high on the agenda of most homeowners. Understanding that fitting the right combination of profile and glass units is important and an area where Selecta supports its customers base.

Providing cost effective solutions to achieving the desired rating is imperative and also understanding that it's not all about obtaining the highest rating! The added cost of reaching a better rating could out-way the expenditure and provide none or very little return on the consumers investment.

U Values

Excellent U Values can be achieved with a 4/20/4 28mm double-glazed unit, whilst a 40mm triple-glazed unit will increase both the thermal and acoustic performance further.

Our technical department continue to work closely with glass manufacturers to ensure that our window and door profiles achieve the best results with the minimum amount of fuss and expenditure.

For instance a U Value of 1.1 W/(m²K) can be achieved with a 28mm DGU, whilst a 40mm TGU can achieve 0.8 W/(m²K), thus Document L and Future Homes Standard compliant. Both glass configurations were attained using 4mm glass.

Glass Specification Examples

The following U Values can be achieved with the glass specifications below:

U Value
0.8 W/(m²K)
Achieved with a 40mm TGU

ADVANCE7 CASEMENT WINDOWS

4Clear/14/4S1 Plus/14/4S1 Plus 40mm with Warm Edge Spacer Bar and Argon Filled

U Value
1.1 W/(m²K)
Achieved with a 28mm DGU

ADVANCE7 CASEMENT / TILT & TURN

4S1 Plus/20/4K Glass (Flip Coating) 28mm with Warm Edge Spacer Bar and Argon Filled

U Value
1.1 W/(m²K)
Achieved with a 28mm DGU

ADVANCE7 SINGLE LEAF & FRENCH DOORS

4S1 Plus/20/4K Glass (Flip Coating) 28mm with Warm Edge Spacer Bar and Argon Filled

ADVANCE70

Enhanced Security

PAS 24 and Secured By Design for Document Q Compliance

Secure windows and doors for total 'peace-of-mind'
A PAS 24 certified window or door gives you the confidence that their family and home will be protected to a high standard.

Selecta have partnered with some of the industries best known window and door hardware brands and suppliers to ensure that the performance of our window and door systems is not compromised.

All hardware used with our window and door systems has been meticulously selected and rigorously tested to PAS 24 industry standards to ensure a high level of security and weather performance.

A well stocked range of tried and tested window and door hardware is available to all our fabricators to enable you to provide PAS 24 and Secured by Design windows and doors that comply with the latest requirements of Building Regulations.

PAS 24 and Secured By Design is your guarantee that a fully fabricated Selecta window or door has been tested to and is being monitored by a UKAS accredited certification body to ensure compliance to the industry standard for enhanced security performance requirements for windows and doorsets in the UK.

PAS 24 and Secured By Design

The PAS 24 standard is an extra security measure to ensure windows and doors are up to the security standards to protect against unwanted visitors.

The testing is based on a burglar trying to manipulate a cylinder and force the lock and hinge side of a door, whilst on a window by forcing entry through the locking points using a selection of tools including 'crow bars', screwdrivers, chisels, drills and blades.
