

Reversible 70

Product Information

spectus

n. look, appearance, aspect

Your perfect PVC-U partner

Reversible 70

A fully reversible window that is ideal for properties with windows in locations that have restricted access for cleaning.

Product features at a glance

- Comprehensive range of profiles that enables the manufacture of composite styles that will suit all types of property and space available
- Internal or external glaze fixed light element suits both commercial and residential applications
- Available in both 24mm or 28mm glazing options providing choice in the levels of thermal and sound insulation
- Same edge detail as the Elite 70 and Patio doors resulting in a reduced number of parts and stock required
- Fully reversible allowing easy cleaning of the outside of the window from the inside
- Reverse functionality operates without entering the property which means there is not disruption to window dressings or cills
- Compatibility across all Spectus range, ensure consistency in design, installation and finish
- A wide range of colour, woodgrain and metallic foil finishes available

Spectus

WINDOW SYSTEMS

For more than 30 years, Spectus Window Systems have been specialists in the design, extrusion and distribution of high quality PVC-U to the UK and throughout Ireland.

From its state-of-the-art extrusion plant, Spectus is one of the UK's largest manufacturers of high quality PVC-U products. Recognised as having the most comprehensive product range in the market, Spectus offers a complete range of window, door and conservatory components in the widest range of colours, all fabricated and fitted to meet the needs of each individual property.

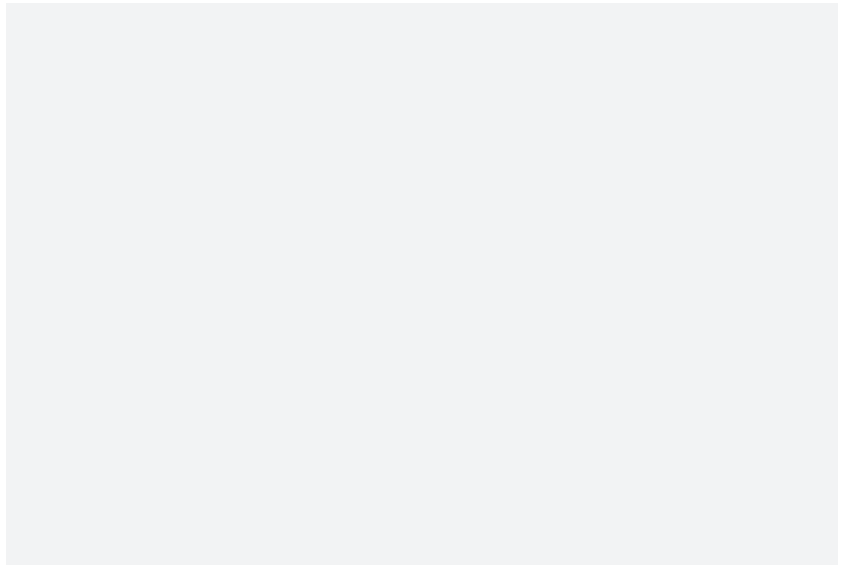

Spectus are registered members of a number of industry regulators and manufacture to the recognised British Standards of quality and performance. Profiles are extruded under a quality management system that conforms to BS EN ISO 9001:2008 and are kitemarked to BS EN 12608.

Spectus is good for the environment

- Our windows and doors provide an outstanding barrier against heat and noise loss - even in the most extreme weather conditions
- Windows and doors made from PVC-U negates the use of timber, protecting the planets trees
- We recycle our own waste and generate new products whilst still retaining the highest standards in quality of material
- Our windows and doors do not require painting and therefore don't consume additional harmful materials or generate associated waste
- Our entire manufacturing process - from production to installation - is confined to the UK and Ireland thereby minimising transportation and fuel consumption from wider exportation
